

His vision. Their future. Your legacy.

The Goldstein Legacy Society was established to honor Dr. Goldstein and ensure his vision for children and families lives on forever. Your support through a legacy gift to The Florida Center in his memory allows vulnerable children to continue receiving the specialized services they need to lead healthy, happy lives.

A beloved pediatrician in Sarasota for over 30 years, Dr. Norman Goldstein's approach integrated behavior, development, and education with traditional medical care. He focused on the whole child, including family, environment, and other factors impacting development.

In 1979, he officially founded an organization devoted to early childhood. Today, The Florida Center for Early Childhood carries on his vision, helping young children overcome challenges and reach their full potential.
